“The Light”

Scarlett Miller

3rd Grade

Ottawa Elementary

The sun is shining down.
Over the mountains and over the hills.

It shines down in every crack and valley
and every pit and pail.

It shines down on the sailing sea
and the roaming creatures that are free.

It shines on everything old or new
even gold or even you.

So, if you see the sun set
don't turn angry or upset.

There is a new light calling to you.
And that light is called the moon.
